Saturday, September 1

Cashman Field

Las Vegas, NV • 7:05 p.m. (PT)

Game 138 • Road Game 58

LAS VEGAS 51s (69-68) 3rd Pacific Southern

- vs -

SACRAMENTO RIVER CATS (54-83) 4th Pacific Northern

51s: RHP Scott Copeland (3-2, 3.02) • River Cats: LHP Daniel Camarena (0-8, 5.67)

Yesterday's Game: The River Cats dropped the first game of their final series of the year in Las Vegas last night by a score of 11-2. Vegas **LHP Matt Gage** got the better of his former team, tossing six innings of two-run ball with 10 strikeouts. **RHP Mike Connolly** was touched up for nine runs (eight earned) en route to his fourth loss with Sacramento this season. **C Ronnie Freeman** and **INF Orlando Calixte** led the way offensively, each finishing with a pair of hits. The River Cats made three errors in the game, the 13th time this season that they have had three or more errors in a game. The bullpen had a good night, as three relievers combined to throw six innings while allowing just one earned run and striking out 10 51s batters.

Today's Starter: **LHP Daniel Camarena (0-8, 5.67)** has been reinstated from the Disabled List to start the game on Saturday night. It will be his first start since August 21 at home against Fresno when he lasted just 3.1 innings while giving up seven runs on eight hits. Camarena has struggled with consistency and some bad luck in his 15 outings this season. He has had six starts where he has gone at least five innings and allowed one run or fewer, and is still without a win on the year. However, the lefty has also had five outings in which he has given up five runs or more. He will look to get on the board with his first win as a River Cat in his final start of 2018.

Garcia & Shaw: River Cats' **C Amamis Garcia** made his Major League debut against the New York Mets last night in San Francisco. The young backstop caught a 7-0 shutout behind the plate and picked up his first hit, RBI, and home run on the same swing when he took Robert Gsellman deep to left field. **OF Chris Shaw** also made his first appearance in black and orange, and broke a scoreless tie with a sacrifice fly in the seventh inning. Shaw will likely see a lot of time in left field for the Giants over the final month of the regular season.

September Call-ups: The River Cats lone "September Call-up" was **RHP Ray Black**, who was added to the big league roster before their day game against the Mets. There will more than likely be others called up now that ML rosters have expanded, as nine players on the River Cats roster are on the Giants 40-man roster. There is a good chance that several more will go up when the minor league season concludes on September 3.

Errors Continue: The River Cats were charged with three errors for the 12th time this season in last night's game and have made at least three errors 13 times (they had a four-error game on May 15 against Tacoma). Sacramento is now 3-10 when they make at least three errors. They also committed three errors in back-to-back games for the second time this year (April 14 and 15 versus Tacoma). The River Cats 122 errors this season is worst in the Pacific Coast League.

This Day in River Cats History: September 1, 2009: The River Cats rolled into Reno for the first of a four game series, rocking the Aces 17-6 and improving to 85-51 on the season...the offense was led by **INF Chris Carter** who went 3-for-5 with three home runs and seven RBI...**DH Matt Carson** also had a big night at the plate, going 4-for-6 with a double, a home run, three RBI, and three runs scored...the two teams combined for 23 runs on 33 hits and six walks.

*ADVANCED HITTING STATS GLOSSARY

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
