Friday, July 13

Raley Field

West Sacramento, CA • 7:05 p.m (PT)

Game 92 • Home Game 47

SACRAMENTO RIVER CATS (39-52) 4th Pacific Northern

- vs -

SALT LAKE BEES (46-45) 2nd Pacific Southern

River Cats: RHP Casey Kelly (8-6, 5.15) • Bees: RHP Luis Pena (1-2, 6.64)

Yesterday's Game: In their first game back from the All-Star break, the River Cats fell to the Salt Lake Bees by the final score of 9-4. River Cats starter **LHP Daniel Camarena** got into some early trouble after surrendering a three-run home run to Salt Lake in the first inning before recording his first out. Camarena was able to bounce back and shut out the Bees in the next four innings and finished with three strikeouts, five walks, and two earned runs in five innings pitched, but received the loss and dropped his record to 0-4. The River Cats got on the board in the fourth inning after a sacrifice fly from **OF Eury Perez** made the score 3-1. Trailing 6-1 in the eighth inning, Sacramento cut into the deficit with three more runs, highlighted by a perfect RBI-bunt single from **INF Kelby Tomlinson**. The Bees would later hit their second three-run home run of the game in the ninth and the River Cats comeback fell short.

Today's Starter: **RHP Casey Kelly** toes the rubber for his 19th start of the season tonight and his ninth start at home, where he has posted a 3.24 ERA so far in 2018. Kelly's last win at home came on June 8 against Colorado Springs where he threw seven innings of one-run ball and struck out six batters. Leading the River Cats pitching staff with 99.2 innings pitched, Kelly has thrown at least 6.0 innings in 10 of his last 13 starts.

Enter Sandman: **INF Jerry Sands** made a strong impression in his River Cats debut, going 2-for-4 with a walk and two runs scored in the River Cats loss last night. In 78 games played this season for Double-A Richmond, Sands slashed .258/.349/.508 with 24 doubles and 13 home runs.

Walk It Out: In last night's game, the River Cats walked seven times and the Bees recorded eight walks. The most walks the River Cats have in a game this season is 12, which came back on April 14 against Tacoma. 15 combined walks in last night's contest is the second-most walks in a game this season after there were 16 walks on April 14 and April 15 earlier this season.

Bay Bridge Series: In the last series before the MLB All-Star break, the San Francisco Giants (49-46) take on the Oakland Athletics (53-41) from across the Bay. The A's lead the regular season series with a record of 59-55 heading into Friday's matchup.

This Day in River Cats History: July 13, 2005: The 2005 Triple-A All Star Game is held at Raley Field for the first and only time in the park's history...**MGR Tony DeFrancesco** is named manager of the Pacific Coast League team, and leads the way to a PCL victory over the International League by the score of 11-5...**OF Matt Watson**, the only River Cat in the starting lineup for the PCL hit a 2-run home run in the sixth to give his side a 9-run lead...the game included future big league stars such as **INF Edwin Encarnacion**, **OF B.J. Upton**, **OF Nate McClouth**, and **INF Ian Kinsler**.

ADVANCED HITTING STATS GLOSSARY*

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
