Saturday, June 30

Raley Field

West Sacramento, CA • 7:05 p.m. (PT)

Game 82 • Home Game 42

SACRAMENTO RIVER CATS (36-45) 4th Pacific Northern

- vs -

FRESNO GRIZZLIES (47-33) 1st Pacific Northern

River Cats: RHP Casey Kelly (7-5, 5.09) • Grizzlies: RHP Rogelio Armenteros (5-0, 3.29)

Yesterday's Game: The River Cats opened a five-game homestand against the Fresno Grizzlies with a 4-0 shutout win on Orange Friday at Raley Field behind strong pitching led by San Francisco Giants **RHP Johnny Cueto**. Cueto, making his second rehab appearance for Sacramento, threw 69 pitches (44 strikes) and struck out six batters in four shutout innings. Sacramento was held off the bases in the first three innings, but exploded for four runs in the fourth inning after an RBI single from **OF Chris Shaw** and capped off with a three-run, line drive home run by **INF Chase d'Arnaud**. That was all the River Cats needed as the bullpen came in to shut down Fresno the remainder of the game. **RHP Derek Law** earned his first win after pitching the final two innings and gave Sacramento the shutout win.

Today's Starter: RHP Casey Kelly (7-5, 5.09) makes his team-leading 17th start of the season, in search of his team-leading 8th victory. The right-hander has pitched at least five innings in each of his last 12 starts, and 13 of 16 overall. In his last start, Kelly struck out six batters over six innings in a 9-4 River Cats victory to earn his seventh win of the season. In five starts against the Pacific Northern division this season, Kelly has a 5.89 ERA with 19 strikeouts before facing off against the Fresno Grizzlies for the first time tonight.

Shutout: After blanking the Grizzlies last night in a 4-0 win, the River Cats earned their first shutout win since May 26 against Albuquerque. It was only the River Cats third shutout win of the season as Sacramento allowed just five hits in the ballgame and the bullpen retired 15 of the final 16 batters.

80: After d'Arnaud's home run last night, the River Cats have hit 80 long balls this season, which ranks 8th in the PCL. Last season, the River Cats reached their 80th home run on July 8. Shaw leads the River Cats this season with 14 homers, but d'Arnaud is a close second with 12.

Fantastic Fourth: The River Cats rallied for four runs in the fourth inning in last night's win and now have scored 59 runs in the fourth inning of their games this season, the most runs they have scored in any inning throughout the season.

This Day in River Cats History: June 30, 2008: LHP Dallas Braden tossed 8 dominant innings, picking up his third win of the season against the visiting Portland Beavers as the River Cats won 5-3...Braden allowed 5 hits and 1 run against the Beavers, but did not walk a batter and struck out 10 while lowering his season ERA to a sparkling 2.38...**DH Wes Bankston** was 2-for-4 with his 14th home run of the season in the victory...two years later, Braden would throw MLB's 19th perfect game on May 9, 2010 (Mother's Day) at home against the Tampa Bay Rays.

ADVANCED HITTING STATS GLOSSARY*

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
