Saturday, June 23

Raley Field

West Sacramento, CA • 7:05 p.m. (PT)

Game 75 • Home Game 39

SACRAMENTO RIVER CATS (33-41) 4th Pacific Northern

- vs -

EL PASO CHIHUAHUAS (37-37) 3rd Pacific Southern

River Cats: RHP Johnny Cueto (0-0, No ERA) • Chihuahuas: RHP Colin Rea (0-0, No ERA)

Yesterday's Game: The River Cats were shut out for the fourth time this season, and second time in their last three games. For the second straight night, the club mustered just four hits. **OF Austin Slater**, who was recalled to San Francisco this morning, collected half of them for his team-leading 22nd multi-hit game. **LHP Matt Gage** pitched well for Sacramento, going six innings and allowing just three runs to go along with four strikeouts. And the bullpen was lights out as three right-handers combined to toss three perfect innings.

Today's Starter: RHP **Johnny Cueto (0-0, No ERA)** takes the mound in his first rehab start as he works his way back from a right elbow strain. Cueto was dealing with San Francisco before hitting the disabled list as he had posted a 0.84 ERA with a .150 opposing batting average in five starts. Cueto is scheduled to throw around 40 pitches this evening and will likely be followed by **LHP Daniel Camerena**, who would have been on the mound tonight if it weren't for Cueto's rehab assignment. Camerena enters the game with a 1.93 ERA in 28 innings pitched since being signed to a minor-league deal on May 24.

El Paso's Pitching: The River Cats have managed just one run against the El Paso Chihuahuas' pitching staff over the last three games. Sacramento ended a five-game set in Texas with a 5-0 loss on June 3, got one run on the board Thursday night, and was shut out again on Friday night. During the three games, the Cats have recorded four hits each time.

Welcome Back Mac: After struggling in San Francisco post concussion, **OF Mac Williamson** is scheduled to return to the River Cats lineup, though he has not been activated yet. In 16 games with the River Cats before being called up, Williamson batted .446 with a .982 slugging percentage thanks to four doubles, a triple, and eight home runs.

Stealing Bases: **INF Chase d'Arnaud** stole his 243rd career minor league base on Friday night, which was his team-leading 13th of the season. He's looking for seventh minor-league season with at least 20 steals, and first since 2015.

This Day in River Cats History: June 23, 2007: **INF Daric Barton** went 2-for-4 in a 6-4 River Cats loss at Salt Lake City. Barton smashed his fifth home run of the season and also collected a single as the two hits continued a torrid stretch for the first baseman, as he collected his eighth straight multi-hit game and extended his hitting streak to 18 games. **OF Jason Perry** also homered for the River Cats, his sixth of the season.

ADVANCED HITTING STATS GLOSSARY*

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
