Isotopes Park

Albuquerque, NM • 5:35 p.m (PT)

Game 79 • Road Game 39

SACRAMENTO RIVER CATS (34-44) 4th Pacific Northern

- vs -

ALBUQUERQUE ISOTOPES (39-38) 3rd Pacific Southern

River Cats: LHP Matt Gage (3-6, 5.89) • Isotopes: LHP Sam Howard (3-4, 5.47)

Yesterday's Game: The River Cats used the longball once again, but fell to the Albuquerque Isotopes by a score of 13-8 on Tuesday night. **RHP Jeff Samardzija** made his third rehab appearance, but got roughed up early, allowing five runs in the opening frame. The River Cats kept it close with homers from **OF Mac Williamson** and **INF Chase d'Arnaud**, but the 'Topes scored seven more times in the seventh inning to put the game out of reach. **C Ronnie Freeman** added a two-run blast in the eighth inning.

Today's Starter: LHP **Matt Gage (3-6, 5.89)** will lead the River Cats in game three of this four game set in Albuquerque. The lefty is still trying to recapture the magic he had early when he allowed just one total run in his first two starts on the road against Las Vegas and Fresno. He has showed improvement as of late, however, giving up just three runs over his last 10.2 innings and lowering his season ERA to 5.89. Gage has struggled all year at missing bats with a strikeout percentage of just 12.4% and 5.3 SO/9.

Road Okert: Going into last night, LHP **Steven Okert** had not allowed an earned run on the road this season in four appearances, though he had been tagged with two unearned runs. Last night was a rough one for the left-hander, as he gave up seven runs (six earned) on six hits while striking out none. Right-handed hitters have been particularly tough for Okert, hitting .469 against him.

Mac Up and Down: **OF Mac Williamson** has had three separate stints with the River Cats this season, and has crushed PCL pitching during each one. To begin the season, he spent 11 games in Sacramento and compiled a .487/.600/1.026 slash line (Average/On-Base/Slugging) with six home runs and 16 RBI. His second stint was just five games on rehab for concussion symptoms, but he slashed .353/.400/.882 with two home runs and seven RBI. Since being optioned by the Giants on June 24, Mac has gone 2-for-8 with two bombs and three RBI. The powerful left fielder has slashed .213/.295/.383 with four HR and 11 RBI in 28 games with San Francisco.

Jones/d'Arnaud All-Star Case: **INFs Ryder Jones** and **Chase d'Arnaud** have quietly made a case for the Triple-A All-Star team this season. They are currently tied for second on the team with 37 RBI, and are hitting .297 and .300 respectively. In June they have been especially good, as Jones has slashed .308/.353/.500 and d'Arnaud has compiled a .355/.500/.532 line. d'Arnaud is currently second in fan voting among second basemen.

This Day in River Cats History: June 27, 2007: The River Cats ran away with one against the Grizzlies, taking a 10-3 win behind the efforts of **INF Daric Barton** and **INF Kevin Melillo**...Barton was 2-for-3 with a two-run home run (his sixth) and 2 runs scored...he extended his hitting streak to 22 games with the two hits...Melillo was 2-for-4 with 3 RBIs...Melillo also hit a two-run home run in the contest.

ADVANCED HITTING STATS GLOSSARY*

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
