Sunday, June 24

Raley Field

West Sacramento, CA • 1:05 p.m (PT)

Game 76 • Home Game 40

SACRAMENTO RIVER CATS (33-42) 4th Pacific Northern

- vs -

EL PASO CHIHUAHUAS (38-37) T-2nd Pacific Southern

River Cats: RHP Taylor Hill (1-2, 8.38) • Chihuahuas: RHP Walker Lockett (2-6, 4.66)

Yesterday's Game: The River Cats dropped their seventh consecutive game with a 3-1 loss to the El Paso Chihuahuas, giving the team just two runs over their previous four contests with El Paso. RHP **Johnny Cueto** made his first rehab start of 2018 since being placed on the disabled list with a strained elbow. His 3.2 innings needed just 48 pitches to retire 11 of the 12 batters he faced with no walks and four strikeouts. The previously scheduled starter, LHP **Daniel Camarena**, piggybacked Cueto and tossed 3.1 innings while allowing all three of El Paso's runs. INF **Chase d'Arnaud** led the offense once again, reaching base three out of four times with a single, double, and a walk. He also stole his 14th base of the season to lead the club.

Today's Starter: RHP **Taylor Hill** is on the bump for today's matinee and series-ender with the Chihuahuas. After five shutout innings in his River Cats debut back on June 2, Hill has surrendered 18 runs in 14.1 innings. Both left-handers and right-handers are batting over .300 against Hill through his first four starts in the Pacific Coast League. He'll look to get back on track this afternoon as he faces the same club he tossed five scoreless innings against back on June 2.

(Un)Lucky number Seven: Sacramento lost their seventh straight game, bringing them within three of the franchise record of 10 straight set in 2015. During the slump, the River Cats have been shut out twice and are averaging just 2.4 runs per game.

Extra Bases: After two consecutive games without an extra-base hit, INF **Chase d'Arnaud** and OF **Chris Shaw** helped get the club back on track with a double each on Saturday night. For both players, it was their 13th two-bagger of the season. d'Arnaud and Shaw also recorded two-hit games — the 15th multi-hit game of the season for d'Arnaud and 14th for Shaw.

d'Arnaud: INF **Chase d'Arnaud** has reached base in 12 straight games. During the run, he's slashing .341/.460/.512 with four doubles, a home run, and eight walks. With a .908 OPS and 137 wRC+, d'Arnaud is currently the most productive offensive threat on the club.

This Day in River Cats History: June 24, 2005: Led by DH **Shawn Garret**, the River Cats routed the Las Vegas 51s 13-6 at Cashman Field. Garret was 5-for-6 on the day with 3 RBIs and hit one of five Sacramento home runs, a two-run homer in the third inning. SS **Mike Rouse** was 3-for-5 with 3 RBIs, 3 runs, and another of the team's home runs. Overall, Sacramento collected 19 hits, including seven extra-base hits as each starter recoded at least one hit and scored a run.

ADVANCED HITTING STATS GLOSSARY*

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
