Thursday, August 9

Raley Field

West Sacramento, CA • 7:05 p.m. (PT)

Game 116 • Home Game 57

SACRAMENTO RIVER CATS (45-70) 4th Pacific Northern

- vs -

EL PASO CHIHUAHUAS (65-49) 1st Pacific Southern

River Cats: RHP Chris Stratton (1-0, 4.91) • Chihuahuas: LHP Dillon Overton (5-2, 3.12)

Tuesday's Game: The River Cats received a solid starting pitching performance from RHP Tyler Herb but mustered just two runs on seven hits and two walks. Herb, tossing his third consecutive game having pitched at least six innings, surrendered two runs on eight hits and two walks. OF Gregor Blanco reached base three times, recording a double, single, and a walk but did not score a run.

Today's Starter: After a brief stint in Sacramento, where he has made 19 starts in the 2018 season, RHP Chris Stratton will once again don a River Cats uniform and make tonight's start against the El Paso Chihuahuas. In two starts in Sacramento this year, Stratton has totalled 11 innings, six earned runs, and 14 strikeouts, including one of the best performances by a River Cats starter this season on July 20 where he allowed just one run while striking out 10 Chihuahuas in six innings.

First Inning Runs: As it has been throughout most of the season, the River Cats pitching staff continues to give up runs to the opposition during the first inning, far more often than any other inning. With two more during Tuesday night's game, it brings the total to 94 on the season, which is 14 more than the next closest (3rd inning), followed by 79 (4th) and 78 (7th).

Another Rehabber: The River Cats will welcome RHP Hunter Strickland to the roster as the hard-throwing relief arm is set to begin his rehab stint while recovering from a broken hand. He's pitched well this year for the Giants, striking out 29 in 31.2 innings while posting a 2.84 ERA pitching mostly 8th and 9th innings. Strickland last played for the River Cats during the 2015 season where he tossed 21.2 innings before being called up to San Francisco.

Consecutive Road Losses: When the River Cats head to Reno on Monday for a three-game set with the Aces, they'll look to avoid setting a franchise record with their seventh straight road loss. Sacramento finished the Tennessee roadtrip losing the final six games, including four in a row to the A's affiliate Nashville Sounds. At this point, they've tied a franchise record with six, having last happened from September 1 to September 6 in 2009.

This Day in River Cats History: August 9, 2011: The River Cats won a thriller, 8-7, in 10 innings over the Las Vegas 51s. Sacramento scored one run in the each of the last three innings with DH Donnie Murphy driving in INF Casey Rogowski for the go-ahead run in the 10th. OF Matt Murton finished 2-for-6 with four RBI and INF Cliff Pennington went 4-for-4 with an RBI. RHP Keith Foulke blew his second save of the season while RHP Jeff Gray earned his second save. The win brought their record to 70-51.

*ADVANCED HITTING STATS GLOSSARY

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
