Tuesday, August 28

Raley Field

West Sacramento, CA • 7:05 p.m. (PT)

Game 134 • Home Game 68

ALBUQUERQUE ISOTOPES (61-72) 4th Pacific Southern

- vs -

SACRAMENTO RIVER CATS (52-81) 4th Pacific Northern

Isotopes: RHP Peter Lambert (2-5, 6.29) • River Cats: RHP Jordan Johnson (1-6, 5.36)

Yesterday's Game: The River Cats scored two runs in the ninth to tie the game up at three, but left the winning run on second base in the bottom of the ninth before surrendering the eventual winning run for Las Vegas a half inning later. Four Sacramento hitters finished the game with two hits, including **C Ronnie Freeman** whose night featured a double. Also racking up two hits were **OF Gregor Blanco**, **INF Ryder Jones**, and **OF Myles Schroder**. The club welcomed back **RHP Casey Kelly**, who tossed six innings and allowed three runs with seven strikeouts in his return to the Sacramento roster. The bullpen was stellar, especially LHP Manny Parra who struck out three of the four batters he faced in the seventh inning.

Today's Starter: RHP Jordan Johnson gets the ball in what will be his final home start of the 2018 season. The righty from Elk Grove faced Albuquerque in New Mexico just two starts ago and tossed seven one-run innings in his longest outing of the year. Johnson owns a 3.38 ERA over his last five starts after being his stint with the River Cats posting a 9.00 ERA in four starts.

No Hits, No Walks, One Run: The winning run for the 51s scored in the top of the tenth inning did not come as a result of a hit or a walk. With the runner starting on second base due to MiLB's new extra-inning rules, all it took for him to score was a passed ball and a sacrifice fly. RHP Derek Law retired all three batters he faced, and "gave up" the winning run and took the loss.

Final Home Series of 2018: The River Cats begin a three-game set against the Albuquerque Isotopes in what will be the start of the last three home games of this 2018 season. The club enters tonight having won just two home series, lost 11, and split four, including the most recent four-gamer with Las Vegas. Overall, the River Cats are 25-42 at home.

Steady Stassi: In 14 games since joining the River Cats, INF Brock Stassi has reached base in all 14 of them. Remarkably, along with batting .405 in the process, he has drawn a walk in all but three games, and drawn more than one walk three times.

This Day in River Cats History: August 28, 2010: The River Cats put up six runs in the bottom of the first in route to a 12-4 victory over the Fresno Grizzlies. A sold out crowd of 14,014 packed Raley Field to see the victory as **C Anthony Recker** went 3-for-4 with 2 home runs and 5 RBIs from the eight slot. The 5-8 spots in the Sacramento batting lineup all scored 2 runs each. RHP Clayton Mortensen went 6.2 innings, allowing 3 runs on 7 hits with 3 strikeouts as he improved his record to 13-6. The win pushed Sacramento even with Fresno at 73-62.

RHP Tyler Herb (1-8, 6.17)

- Joined Giants' farm system after becoming the "player to be named later" in the Chris Heston trade to Seattle
- Originally drafted by the Mariners (29th round) in 2014
- Threw his first career nine-inning complete game on August 21, 2017 against Erie, striking out five and allowing just six baserunners.

*ADVANCED HITTING STATS GLOSSARY

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
