### Friday, August 10

Raley Field

West Sacramento, CA • 7:05 p.m (PT)

Game 117 • Home Game 58

### SACRAMENTO RIVER CATS (46-70) 4th Pacific Northern

- vs -

### EL PASO CHIHUAHUAS (65-50) 1st Pacific Southern

River Cats: LHP Daniel Camarena (0-7, 5.61) • Chihuahuas: RHP Kyle Lloyd (3-1, 6.55)

**Tuesday's Game:** The Sacramento River Cats snapped their six-game losing skid behind an excellent start from **RHP Chris Stratton** and solo home runs from **INF Myles Schroder** and **OF Peter Bourjos**. In his third start with Sacramento, Stratton struck out eight batters and allowed just one run in a season-high seven innings pitched. The River Cats got on the board in the second inning when Schroder crushed a solo shot to left field to take a 1-0 lead. The Chihuahuas would tie the game in the fourth inning, but Bourjos would untie it in the seventh with a solo home run of his own. Bourjos' first home run with the River Cats would prove to be the winning run as Sacramento defeated El Paso by the final score of 2-1.

**Today's Starter:** **LHP Daniel Camarena (0-7, 5.61)** takes the mound for his 12th start after Casey Kelly was moved to the Major League Taxi Squad. Camarena is still seeking his first win with the River Cats after striking out seven batters, which tied a season-high, in his last start on August 5 against Nashville. He is definitely more comfortable at home as he has posted a 4.13 ERA at Raley Field this season. Camarena started the season fairly hot with a 2.50 ERA during May and June, but started to have a tough time once the calendar flipped to July, where he posted an 11.42 ERA.

**Bourjos Bomb:** In his 22nd game with Sacramento, Peter Bourjos hit his first home run in 88 plate appearances. The solo shot was also Bourjos' first since May 26 when he was with Triple-A Gwinnett earlier this season. Bourjos' set a career high with 13 home runs back in 2010 when he played for Triple-A Salt Lake.

**Kelby Hits:** **INF Kelby Tomlinson** is currently riding a 10-game hitting streak dating back to July 3. During the streak Tomlinson is hitting .500 with three runs and four RBI. Since July 2, Tomlinson has raised his batting average from .191 to .277 where it stands now.

**Lefty Victory:** For the first time since June 25, the River Cats defeated a left-handed starting pitcher. With the victory last night, Sacramento is now 2-10 against southpaws at home and moves to 5-21 overall against lefties this season.

**This Day in River Cats History: August 10, 2013:** The River Cats defeated the Omaha Storm Chasers in a shutout, 10-8...**OF Shane Peterson** led the way offensively for Sacramento, slugging two home runs and finished the game with five RBI...**DH Michael Choice** drove in a run, his 77th RBI of the season...**RHP Bruce Billings** got the win for the River Cats, bringing his record to 12-5 on the year... he allowed two runs over six innings while striking out five...**RHP Paul Smyth** earned the save, his first.

## \*ADVANCED HITTING STATS GLOSSARY

### PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

### OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

### ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

### BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

### wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

### wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

### K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

## ADVANCED PITCHING STATS GLOSSARY\*

### TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

### AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

### BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

### LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

### FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

### K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

### xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
