Wednesday, August 22

Raley Field

West Sacramento, CA • 7:05 p.m. (PT)

Game 128 • Home Game 62

FRESNO GRIZZLIES (73-54) 1st Pacific Northern - vs - SACRAMENTO RIVER CATS (50-77) 4th Pacific Northern

Grizzlies: RHP Brock Dykxhoorn (5-2, 3.66) • River Cats: RHP Jordan Johnson (1-6, 5.36)

Yesterday's Game: The River Cats fell behind early to the first-place Fresno Grizzlies as they trailed 7-0 through three innings. The club would get a couple runs on the board in the fourth and fifth innings, including a solo home run by **OF Peter Bourjos**, which was his second home run of the season. Bourjos led the subdued offensive charge with two hits in the game, while **INF Brock Stassi** and **C Ronnie Freeman** each did their part in getting on base as they drew two walks apiece. If the River Cats were going to come back in last night's game, they needed the solid effort from the bullpen, who managed to allow just two unearned runs in the final 5.2 frames. But Sacramento eventually fell 9-2 for their fourth loss in a row.

Today's Starter: RHP **Jordan Johnson** is on the hill tonight for the River Cats making his ninth start of the year in Triple-A since being called up from Double-A Richmond in early July. His last outing — a road start in Albuquerque — Johnson posted his longest start, innings-wise, of the season as he pitched seven strong innings allowing one earned run (two total) on seven hits and one walk. Though, he did post his lowest output of strikeouts as just one was tallied on the night. Wednesday night will be Johnson's third time facing Fresno this year. In those two starts, he totaled nine innings, 11 hits, seven earned runs, eight walks, and seven strikeouts.

Home Run Drought Snapped: With **OF Peter Bourjos's** fifth-inning solo home run, the River Cats broke a streak of ten consecutive games without clearing the fence. Interestingly enough, the last home run hit by Sacramento was also hit by Bourjos, back on August 9 at home against the El Paso Chihuahuas.

Beede is Back: RHP **Tyler Beede** made his return to the mound after missing 18 games on the disabled list. He allowed one hit and one walk, but recorded a strikeout for each of his three outs in the eighth inning.

Free Passes: The River Cats drew five walks on Tuesday night, giving them their most in a single game since July 26. As a team, Sacramento has drawn the fifth fewest walks in the Pacific Coast League.

This Day in River Cats History: August 22, 2013: The River Cats beat the Salt Lake Bees at Smith's Ballpark 10-2 behind two home runs off the bat of **INF Dallas McPherson**. He launched a two-run shot in the top of the first inning to give the River Cats an early lead. Then the left-handed slugger hit his second, another two-run homer, as a part of a River Cats six-run third innig. He ended up going 3-for-5 with four RBI in the win.

RHP Tyler Herb (1-7, 5.13)

- Joined Giants' farm system after becoming the "player to be named later" in the Chris Heston trade to Seattle
- Originally drafted by the Mariners (29th round) in 2014
- Threw his first career nine-inning complete game on August 21, 2017 against Erie, striking out five and allowing just six baserunners

*ADVANCED HITTING STATS GLOSSARY

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
