Greater Nevada Field
 Reno, NV • 7:05 p.m (PT)
 Game 88 • Road Game 43

SACRAMENTO RIVER CATS (38-49) 4th Pacific Northern

- vs -

RENO ACES (40-47) 3rd Pacific Northern

River Cats: RHP Casey Kelly (7-6, 5.21) • Aces: RHP Taylor Clarke (8-6, 4.26)

Yesterday's Game: A slugfest broke out in Reno on Thursday night, beginning with the Reno Aces jumping out to an 8-0 lead after four innings. The River Cats surged back to tie things at nine, but fell 10-9 to the Aces in walk-off fashion. Five Sacramento hitters had multi-hit games, lead by **INF Ryder Jones'** 4-for-5 performance which included his eighth homer and two RBI. **OF Chris Shaw** also mashed his 18th home run, his fourth in his last six games. **LHP Daniel Camarena** had a rough outing, going five innings and allowing eight runs (seven earned) on eight hits, two walks and two strikeouts. **RHP Ray Black** had another dominant outing, working a perfect eighth with two strikeouts.

Today's Starter: RHP Casey Kelly (7-6, 5.21) will take the mound in game three of the River Cats five-game series in the Biggest Little City. Kelly has been a model of consistency for Sacramento, taking the ball every fifth day and providing a veteran presence. He leads the team in starts (17), innings pitched (93.1), wins (7), and strikeouts (73). He had been an excellent run having not allowed a home run in five straight starts (2-1, 1.58 ERA over those five starts), but in his last three starts he has allowed four total home runs and they have come back to bite him. Kelly will be making his league leading 18th start this evening, looking to get back on track and avoid the longball.

Doubles: River Cats' OFs **Steven Duggar** and **Austin Slater** have been among the league leaders in doubles throughout this season, with each of them leading at one point. With Slater now in the big leagues, Duggar has taken the top spot in the PCL with his 26 two-baggers. Despite these two doubles-machines, the River Cats rank just seventh as a team in total doubles.

Rehab No More: After two rehab starts with Sacramento, San Francisco Giants' RHP **Johnny Cueto** was reinstated from the disabled list before his start against St. Louis last night. He allowed five runs on 10 hits in his five innings of work. In his two starts with the River Cats, Cueto tossed a total of 7.2 shutout innings, allowing just five hits and striking out ten. Fellow Giants' RHP **Jeff Samardzija** is expected to be reinstated and start Saturday, July 7 against the Cardinals.

Black & Dirty: This is nothing new, but RHP **Ray Black** put forth another excellent performance in last night's 10-9 defeat. The righty tossed a perfect eighth inning with two strikeouts, throwing a total of 15 pitches (10 strikes). Black has not allowed an earned run since June 7, and has allowed 10 hits in 21.2 innings pitched overall this season, good for a .133 opponents batting average.

This Day in River Cats History: July 6, 2010: **C Josh Donaldson** went 2-for-5 with two home runs as the River Cats rallied from a 9-5 deficit to beat the Reno Aces 14-13. Donaldson came into the game in a 1-for-20 slump, but broke out in a big way, mashing two two-run homers on his way to a 4-RBI day. The game saw a total of 5 batters hit by a pitch and 8 runs scored in the final two innings. Trailing 14-10 in the bottom of the ninth, Reno managed to score 3 before stranding the tying run at third base. **INF Steve Tolleson** was 2-for-5 with a triple and 3 RBIs in the comeback win.

ADVANCED HITTING STATS GLOSSARY*

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
