Thursday, August 30

Raley Field

West Sacramento, CA • 7:05 p.m (PT)

Game 136 • Home Game 70

ALBUQUERQUE ISOTOPES (61-74) 4th Pacific Southern

- vs -

SACRAMENTO RIVER CATS (54-81) 4th Pacific Northern

Isotopes: RHP Jeff Hoffman (6-8, 4.69) • River Cats: RHP Shaun Anderson (2-2, 3.61)

Yesterday's Game: In another thrilling one-run ballgame, the Sacramento River Cats prevailed by the final score of 2-1 over the Albuquerque Isotopes for the second consecutive night. **RHP Tyler Herb** pitched a gem, striking out seven batters in a season-high seven innings and kept the River Cats in a tight ballgame by allowing just one run. Trailing 1-0 in the sixth inning, **OF Peter Bourjos** ripped an RBI single to right field to knot the game at one apiece. In the following inning, **OF Chris Shaw** would put the River Cats in front with a monster home run to right-center and his 24th bomb of the season. The bullpen slammed the door and Sacramento would come out with a 2-1 victory and a series win.

Today's Starter: **RHP Shaun Anderson** takes the mound for the final game at Raley Field for 2018. Anderson was masterful in his last start, allowing just four hits with seven strikeouts in seven shutout frames. In his last six starts, he has lowered his ERA from 6.55 down to 3.61 with 25 strikeouts. Anderson last faced Albuquerque on August 17 and allowed three earned runs in six innings of work.

Series Win: With a 2-1 victory in last night's contest, the River Cats clinched their third home series of the season and just their second series win since July 2 when they took three out of five games against the first-place Fresno Grizzlies.

Put it on the Board: Shaw's 458-foot long ball not only lifted the River Cats over the Isotopes, but was the third-longest home run hit by a Sacramento batter at Raley Field this season. Shaw is responsible for six of the top 10 farthest home run balls hit this season at home for Sacramento

Quick Victory: The River Cats took care of the Isotopes last night in just two hours and nine minutes, the shortest game of the 2018 season. The shortest nine-inning game prior to last night was two hours and 17 minutes on August 9.

Take Me Home: Sacramento enters tonight with a 27-42 record at home this season. In 2017 the River Cats finished 36-35 at home and 34-38 at Raley Field in 2016.

This Day in River Cats History: August 30, 2011: The River Cats returned to Raley Field after a nine-game road trip and dominated the Las Vegas 51s 13-1 to take the first game of the series...a solo home run from **INF Chris Carter** got the game started off right, leading into a four-run second inning that resulted from a rocky start from 51s pitcher Kyle Drabek, who left with a 9-0 deficit...a third-inning grand slam by **INF Wes Timmons** piled on to the River Cats lead...Timmons extended his hitting streak to nine, going 2-for-4 with 6 RBIs...**C Landon Powell** went 4-for-5 with 2 runs scored.

*ADVANCED HITTING STATS GLOSSARY

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
