Tuesday, August 21

Raley Field

West Sacramento, CA • 7:05 p.m. (PT)

Game 127 • Home Game 61

FRESNO GRIZZLIES (72-54) 1st Pacific Northern - vs - SACRAMENTO RIVER CATS (50-76) 4th Pacific Northern

Grizzlies: RHP Rogelio Armenteros (7-1, 3.68) • River Cats: LHP Daniel Camarena (0-7, 5.05)

Sunday's Game: The River Cats dropped the series finale to the Albuquerque Isotopes by the final score of 7-1. **RHP Mike Connolly** received a rude welcome back to Triple-A in his first start with the River Cats since July 14 against Salt Lake. Connolly allowed runs in each of the first four innings and gave up five total in his five innings pitched. Sacramento tallied eight hits on the evening, but left a season-high 15 men on base and squandered some key opportunities. Despite the loss, **INF Miguel Gomez** went 2-for-4 with a double and an RBI single. Most notable about Sunday's game, however, was **INF Kelby Tomlinson** who went 0-for-4, snapping his 18-game hitting streak.

Tonight's Starter: **LHP Daniel Camarena (0-7, 5.05)** takes the mound for his 14th start of the season. Camarena has started to come along slowly after a tough July and beginning of August. In fact, his best start of the year came in his last start at Raley Field on August 10. The lefty hurled seven innings of shutout baseball and allowed just one hit. After four consecutive losses, Camarena has posted a no decision in his last 2 starts and has combined for three runs allowed in 12 innings pitched. Though he is 0-3 at home this season, Camarena has a 3.31 ERA at Raley Field as opposed to a 6.75 ERA on the road.

Multi-Hit Gomez: With his 2-for-4 performance in Sunday's contest, Gomez has now recorded five consecutive games with multiple hits. He is batting .500 in the last five games and has raised his season batting average from .256 to .289 during that span. Gomez also had three consecutive games at the beginning of July where he also recorded multi-hit games and now has 15 in 49 games played for Sacramento.

Streak Snapped: Tomlinson's 18-game hitting streak came to an unfortunate end after going 0-for-4 in Sunday's game. Kelby broke the previous longest hitting streak set by Austin Slater on May 22. Tomlinson racked up 26 hits (all singles) with a .400 batting average during the streak and bumped his season average up to .285.

Rocky Rogers: **RHP Tyler Rogers** allowed two earned runs on Sunday for the first time since June 19 in New Orleans. Rogers has allowed more than one run in just three outings all season. In June he posted a 1.32 ERA followed by a 1.17 ERA during the month of July. However, since the beginning of August, the submariner has a 7.50 ERA in six appearances.

This Day in River Cats History: August 21, 2013: The River Cats rallied to score three times in the ninth, taking a 7-5 lead over the Colorado Springs Sky Sox en route to their 73rd win of the season... the ninth-inning rally was sparked by back-to-back walks by **INF Daric Barton** and **OF Shane Peterson** walk...**DH Michael Choice** drove in both runners with his second double of the day and scored one batter later on **OF Michael Taylor's** RBI-single...**LHP Brian Gordon** pitched a perfect ninth to record his 19th save of the season.

*ADVANCED HITTING STATS GLOSSARY

PA: Plate Appearances

Plate Appearances are the total number of times a hitter completes a turn batting.

OPS: On-Base Plus Slugging

On-base Plus Slugging (OPS) is the sum of a player's on-base percentage (how often a player reaches base safely) and their slugging percentage (how many bases a player reaches per at bat).

ISO: Isolated Power

Isolated Power (ISO) is a measure of a hitter's raw power. Or, to look at it another way, it measures how good a player is at hitting for extra bases. The simplest way to calculate ISO is to subtract a player's Batting Average from their Slugging Percentage, which leaves us with a measure of just a player's extra bases per at bat.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how many of a batter's balls in play go for hits. Affected greatly by defense and luck, BABIP can dramatically affect a hitter's batting average. If a large number of a batter's balls in play go for hits, that can boost their batting average quite high. Similarly, if a large number of balls in play get caught, it can reduce a player's total offensive value.

wRC+: Weighted Runs Created Plus

Weighted Runs Created Plus measures the total number of runs a player contributes to their team. The formula accounts for a player's ability to get on base, their total number of bases, and their baserunning. The Plus version of the stat is park and league adjusted.

wOBA: Weighted On-Base Average

Weighted On-Base Average combines all the different aspects of hitting into one metric, weighting each of them in proportion to their actual run value. While batting average, on-base percentage, and slugging percentage fall short in accuracy and scope, wOBA measures and captures offensive value more accurately and comprehensively. (Due to no constant in minor league baseball, the wOBA statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a position player walks or strikes out per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

ADVANCED PITCHING STATS GLOSSARY*

TBF: Total Batters Faced

Total Batters Faced measures the total number of plate appearances hitters have made against him.

AVG: Batting Average

Batting average is the rate of hits per at bat, calculated as hits/at bats.

BABIP: Batting Average on Balls In Play

Batting Average on Balls In Play (BABIP) measures how often a ball in play goes for a hit. Typically around 30% of all balls in play fall for hits, but there are several variables that can affect BABIP rates for individual players, such as defense, luck, and talent level. Hitters have more control over their BABIP than pitchers do.

LOB%: Left On Base Percentage

Left on Base Percentage (LOB%) measures the percentage of base runners that a pitcher strands on base over the course of a season. This stat does not use the left on base numbers reported in box scores, but instead is calculated using a pitcher's actual hits, walks, and runs allowed results.

FIP: Fielding Independent Pitching

Fielding Independent Pitching (FIP) measures what a player's ERA should have looked like over a given time period, assuming that performance on balls in play and timing were league average. (Due to no constant in minor league baseball, the FIP statistic is approximate).

K% & BB%: Strikeout Rate and Walk Rate

Strikeout rate (K%) and walk rate (BB%) measure how often a pitcher walks or strikes out a player per plate appearance. They're measured in percentage form, so it's easy to compare between players and years.

xFIP: Expected Fielding Independent Pitching

Same as FIP, but it normalizes a pitcher's home runs allowed based on their fly ball rate rather than simply using the raw number of home runs allowed.
